PROJECTS

UniConnect - Academic Social Platform

[Github](#)

June 2025 - March 2026

- Developed a full-stack web platform to support student collaboration, resource sharing, peer tutoring, event management, and a student marketplace.
- Built using PHP and JavaScript with AJAX for asynchronous communication and CSS for responsive UI design, implementing role-based authentication.

Tailoria - Online tailoring order management web app

[Github](#)

On going

- Developed a full-stack web platform for online tailoring orders enabling customers to place orders, upload measurements and design images, schedule deliveries, and track order status; includes an admin dashboard for tailors to manage orders, update statuses, set prices, and contact customers.
- Built with a React frontend (React Router, Context API) and REST API integration using Axios for asynchronous communication; styled with Tailwind CSS and implemented responsive, accessible UI.
- Implemented role-based authentication and session handling, file upload flows for measurements/designs, order forms with validation, and dashboard views for order lifecycle management and statistics.
